Blantyre
LIFE

Independent Living

Can you control the home?

Voice assistants can give people a greater sense of choice, control and independence.

Smart lighting can be controlled via voice and the app.

Smart speakers can be used to control smart home devices.

Smart home devices can be controlled via voice and the app.

Safe and well at home

The future of care

This campus uses technology enabled care to support people in their own homes and in the integrated care facility to live more independent, healthier lives.

Find out more about technology enabled care.

Independent Living

Safe and well at home

Sensors around a home can provide important information to help people make informed decisions about health and care.

Connected Living

The doctor will see you now

Digital technology is helping patients to attend appointments from home or wherever is convenient as well as enabling patients to actively manage their health conditions.

These NHS services are widely used across Scotland and are easily accessed using a computer, tablet, laptop or smartphone.

Thank you!
