

How to add a webpage to your home screen

Sometimes you'll want to save a webpage to your home screen. This will allow you to access it more quickly in the future. Follow the steps below to do this on an iPhone.

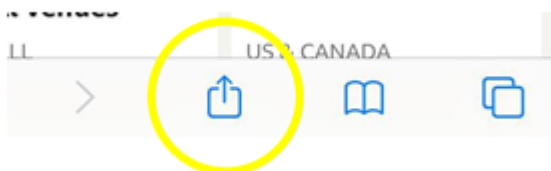

Step 1

Go to the website that you want to visit.

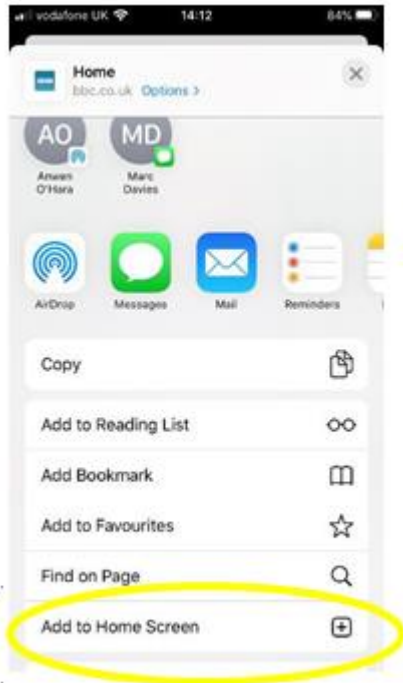

Step 2

Press the little box with the upwards arrow at the bottom of the page.

Step 3

A menu will appear. Select the option which says "add to home screen".

Step 4

Press the 'Add' button.

Step 5

The website will now appear as an icon on your Home Screen every time you use your device.
